Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Aga171

paptidy-dipeptidase A (EC 3.4.15.1) precursor - mouse
NyAlternate names: ACE, angiotensin-converting enzyme; carboxycathepsin; dipeptidy] cart
C;Decise: Name musculus (house mouse)
C;Dete: 10-Sep-1999 #sequence revision 10-Sep-1999 #text_change 09-Jul-2004
C;Accession: A34171; A29220; A61477

                                                                                                                                         DEVELOPMENTAL STAGE: Expressed both maternally and zygotically in
cellular blastoderm formation, particularly concentrated in pole plasm. Zygotic expression detected during cellular blastoderm stage in endodermal anlagan of anterior and posterior midgut at both poles. After gastrulation, expression detected in invaginating ventral furrow of mesoderm. Continued expression in anterior and posterior midgut and mesoderm during germband extension. During late germ-band retraction, expression remains detectable in fusing midgut and presumed developing somatic
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                                                                             embryos.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Description

Patent No. 6747137

GENERAL INFORMATION:
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO CANDIDA ALBICAN TITLE OF INVENTION: NUMBER: US/09/248,796A

FILE REFERENCE: 107196-112

FILE REFERENCE: 107196-112

PRIOR PELING DATE: 1998-02-12

PRIOR PILING DATE: 1998-02-13

PRIOR FILING DATE: 1998-08-13

PRIOR FILING DATE: 1998-08-13

NUMBER OF SEQ ID NOS: 28208

LENGTH: 163
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ô
                                                                                                                                                                                                                                                                                                      DEBLICANT: Herrnstadt, Corrina
